

MACK®

Mack and Electromobility

More than just a truck, when you buy the Mack® LR Electric, you plug into a coast-to-coast network of service, support and over 120 years of trucking experience.

BORN READY.

Mack is the choice for refuse eMobility.

Peace of mind. Backed by the Mack Ultra Service Agreement.

Every Mack LR Electric purchase or lease is accompanied by our most comprehensive 5-year, bumper-to-bumper protection plan to ensure your vision for eMobility is covered for the future.

THE MACK ULTRA SERVICE AGREEMENT INCLUDES:

GuardDog® Connect, Mack's advanced uptime, telematics and connectivity services

Coverage for all electrical control systems, powertrain, chassis, suspension, cab, steering systems and more

Battery performance guarantee
(80% state of health)

All scheduled maintenance

All preventative maintenance

All repairs (excluding accident)

24/7 roadside assistance

Service from Mack EV Certified Dealers

Pick how you plug in.

Whether you're fully committed to building your eMobility fleet infrastructure or looking to see what a single Mack LR Electric can do for you, Mack offers multiple financing or leasing options with expanded bundles available to help you carry your insurance and infrastructure needs.

Vehicle as a Service (VaaS)

Add eMobility to your fleet without any major capital investments or long-term commitments. The VaaS all-inclusive lease allows you to put aside concerns about changing technology and harness the power of Mack's experienced team, tools and technicians in a single monthly payment.

VAAS INCLUDES:

Tap into the power of telematics with Mack's suite of connectivity, analytics and uptime tools included in the Mack Ultra Service Agreement.

Simplify your billing, payment and data analytics with complete integration.

Include taxes and licensing costs with your single monthly payment for easier cost calculations.

Choose your level of commitment with full lifecycle financing options and renewable 5-year terms.

Ease into eMobility with no upfront residuals including the end-of-term option to buy, renew or walk away.

Manage all of your costs with additional insurance, infrastructure and energy coverage available.

Infrastructure as a Service (IaaS)

Mack takes the guesswork out of infrastructure upgrades with our flexible Infrastructure as a Service turnkey solutions. Available for all vehicle purchases or leases, IaaS allows you to choose your level of commitment and involvement in your infrastructure upgrades.

IAAS INCLUDES:

Tap into the power of telematics with Mack's suite of connectivity, analytics and uptime tools included in the Mack Ultra Service Agreement.

Mack takes care of all charging station design, installation, hardware, software and construction so you can focus on your business.

Ease your mind knowing that all vehicle operations and maintenance costs are covered.

Simplify your operations with Mack's energy optimization and LCFS management tools.

All-inclusive financing available, including up to a 60-month loan.

Finance your future with Mack Financial Services.

Whether you're looking to buy, lease or test out the Mack LR Electric, Mack Financial Services (MFS) offers flexible payment plans on a lease, purchase, or Vehicle as a Service (VaaS) option, with expanded bundles available for insurance and charging infrastructure.

MFS PACKAGES INCLUDE:

VaaS Fair Market Value (FMV) lease with a 60-month term

Standard retail financing up to 72 months

Municipal lease options

All options include interest-free bundling of the Mack Ultra Service Agreement payment with the LR Electric truck payment.

Customer qualification and eligibility are subject to review and approval by MFS and are at MFS' sole discretion. Approvals will state transaction terms following MFS credit underwriting, as well as any other conditions deemed appropriate by MFS. These options are available only in the U.S. and on qualified units financed through MFS. MFS reserves the right to amend or cancel the programs at any time without notice.

eMobility. Engineered by Mack. Tailored to you.

Before any Mack LR Electric is ordered, Mack's Route Support Services works hand-in-hand with your operation to ensure application excellence of our truck in your fleet.

With customized solutions to help you enter the world of electromobility, an extensive and experienced support network and a wide range of infrastructure and service options, Mack makes it easy to ensure your business and our planet both have a bright future.
